Supporting Individuals and Organisations with the AI Transition

AI: Productivity And Growth Bring New Risks

Managing AI risks and opportunities needs new skills, capacity and process. The pace of AI change means training and firefighting alone cannot deliver. Your hidden strength lies in your people. Developing AI competence requires an evolving organisational culture.

The Challenge

Yes, LLM AI is truly a new paradigm, we agree! But people are not peripherals. Challenge becomes how to build capacity while enhancing the interplay between humans and machines (AI)?

- Where are your top tech vulnerabilities?
- What is the true cost of losing your best people?
- How are your people using, or avoiding AI?
- Who has built operational systems with AI?
- Where is trust and alignment highest/lowest?
- How is productivity being realised?
- How is new capacity being exploited?
- What new threats does your workforce perceive?

> *"There are two kinds of value at work in every organisation. Economic value (T1) — easily measurable outputs. And Relational value (T2) — the shared knowledge and trust that makes everything else possible. Most organisations only see T1. VEmapper reveals both."*

VEmapper Discovery

- NOT a survey — Surfacing the tacit knowledge hidden within your workforce
- Architectural risks — Not just shipping products that increase vulnerability
- Data corpus — Based on thousands of organizations and individual experiences

ARTICULATE YOUR TRUE AI MATURITY AND CAPABILITY

SURFACE TRUST AND IDENTITY; OPPORTUNITIES AND THREATS

VISUALISE YOUR ORGANISATION'S NETWORK OF HIDDEN VALUE

PRIORITISE WHERE TO FOCUS FOR MAXIMUM STRATEGIC IMPACT

REALIGN HUMAN-AI PARTNERSHIPS AROUND ORGANISATIONAL CAPABILITIES

YOU SEE WHAT'S MISSING

KNOWLEDGE MAP

Where expertise actually lives; Not job titles, but what people know and have done

RELATIONAL GRAPH

Searchable, actionable insights; Who bridges teams, who's isolated, where is trust strong or fragile

BLOCKERS & INSIGHTS

Where change is stalling and why; Identify friction points before they become crises

PILOT PROJECTS

Prioritise the most valuable learning journeys; Scale success

HOW IT WORKS

1

1. DISCOVER

Facilitated conversations surface what people value, contribute, and need

2

2. CAPTURE

Responses structured into Value Exchange profiles on the VEmapper platform

3

3. ANALYSE

AI identifies patterns, gaps, and high-value nodes across the network — T1 and T2

4

4. VISUALISE

Direct and common value flows mapped across your organisation

5

5. ACT

Prioritise suggestions integrated into you strategy, people and change activities

REPEAT

WHERE ORGANISATIONS START

CHANGE & TRANSFORMATION

Identify the human networks that will make or break your next change programme — before it launches

WORKFORCE & CULTURE

Understand the real value your people create and exchange — surface contributions that performance frameworks miss

PARTNERSHIPS & STAKEHOLDERS

Map value exchanges between your organisation and its ecosystem — across partners, suppliers, regulators, and communities

WHY NOW?

- **Human - AI Teaming Creates Exponential Opportunity** — Once aligned with capabilities and new roles
- **AI is transforming every sector** — But AI without human context creates risk, not value
- **Regulatory and governance expectations** — Increasingly require evidence of real relationships and accountability
- Current focus on AI productivity is leaving value on the table — **New Skills, Better Decisions, Creativity**

> *Organisations that can see their value networks adapt faster, retain more, and lead with confidence*

Begin your Discovery today

A structured session with your leadership team. Real, actionable insight.
